Professional Summary

Senior Full Stack Developer with 8 years of experience designing, building, and scaling web applications across SaaS, enterprise, and e-commerce systems. Strong expertise in React, Vue, Angular, Node.js, PHP (Laravel), and cloud-based architectures (AWS, CI/CD pipelines).

Experienced in leading full project lifecycles—from system architecture and database design to deployment and production support. Proven ability to deliver secure, scalable, and high-performance applications in Agile environments while collaborating with cross-functional teams and stakeholders.

Core Skills

Frontend: ReactJS, Vue, Angular, TypeScript, JavaScript, HTML, CSS, Tailwind, SCSS

Backend: NodeJS, PHP (Laravel), Python, .NET, C#, Java

Databases: PostgreSQL, MySQL, MongoDB, MSSQL

APIs: REST, GraphQL, 3rd-party integrations

DevOps: AWS, Azure, Vercel, Render, S3, Docker, Jenkins, CI/CD, Git Actions, GitLab

Practices: System Design, Agile/Scrum, Code Reviews, Testing, Architecture

Professional Experience

Senior Full Stack Developer (Contract)

Trixicon LTD – January 2026 – March 2026

Tech: JavaScript, CSS, SCSS, Html, VueJS, Laravel, Docker, AWS, CI/CD, PostgreSQL

- Led end-to-end development of a full-scale e-commerce platform from architecture to production deployment
- Designed scalable system architecture covering frontend, backend, database, and infrastructure
- Developed responsive UI components and robust REST APIs for core business workflows
- Implemented secure authentication, authorization, and payment gateway integration
- Built CI/CD pipelines and managed cloud deployment on AWS

- Produced full technical documentation including API specs and deployment guides
- Acted as sole technical owner for architecture, implementation, and production support

Senior Web Developer (Contract)

Pro Integrate / PLDT Global – July 2025 – January 2026

Tech: JavaScript, CSS, Html, CI, Java, Laravel, PostgreSQL, VueJS

- Delivered new features and system enhancements aligned with client requirements
- Built responsive frontend interfaces and optimized backend services
- Integrated REST APIs and third-party services for system interoperability
- Strengthened application security through validation, authentication, and access control
- Debugged and resolved complex full-stack production issues
- Designed and optimized database structures, queries, and backend logic for performance improvements
- Performed testing, troubleshooting, and production support for enterprise applications
- Maintained legacy systems while enhancing application scalability and maintainability
- Collaborated with project managers, QA engineers, and stakeholders throughout the development lifecycle

Mid-level Full Stack Developer

Xurpas Enterprise Inc. – Sep 2022 – June 2025

Tech: Laravel, Nodejs, Angular, Vue, AWS, Jenkins, CI/CD, Git, Vue, ReactJS, NextJs, .NET, Drupal, CMS, Twig

- Designed and developed scalable backend APIs for enterprise systems
- Contributed to CI/CD pipeline implementation and deployment automation
- Provided architectural guidance for feature planning and system improvements.
- Improved application performance, security, and maintainability through code optimization
- Collaborated with QA, UI/UX designers, and business analysts throughout development cycles
- Participated in Agile/Scrum ceremonies including sprint planning, code reviews, and retrospectives
- Assisted in mentoring junior developers and promoting development best practices
- Implemented authentication, role-based access control, and secure API communication
- Monitored and resolved production issues, bugs, and deployment-related problems
- Developed and maintained enterprise web platforms using Drupal and custom JS components
- Improved frontend reusability and system maintainability
- Participated in Agile ceremonies including sprint planning and code reviews
- Customized Drupal themes and Twig templates based on project requirements
- Collaborated with backend developers, QA teams, and designers to deliver project features

- Assisted in deployment activities and environment configuration updates
- Troubleshoot and resolved frontend issues, cross-browser compatibility problems, and UI bugs

Full Stack Developer

Fasttrack Solutions Inc. – Feb 2022 – Aug 2022

Tech: C#, .NET, SAP B1, SAP HANA, CodeIgniter, PHP, Javascript

- Developed and integrated enterprise business applications
- Optimized backend processes and improved query performance
- Collaborated with cross-functional teams on system enhancements
- Designed and maintained RESTful APIs for system integration and data synchronization
- Implemented database queries, stored procedures, and reports using SAP HANA
- Customized and supported SAP Business One modules based on client requirements
- Troubleshoot and resolved application bugs, system issues, and performance bottlenecks
- Developed frontend features using JavaScript, HTML, and CSS for improved user experience
- Participated in system testing, deployment, and production support activities
- Worked closely with clients and stakeholders to gather requirements and provide technical solutions

Full Stack Developer

RDF Feed, Livestock & Food Inc. – Nov 2017 – Feb 2022

Tech: Laravel, NodeJS, C#, .NET, Vue, Angular, React, MongoDB, VanillaJS

- Developed internal enterprise systems and scalable REST APIs
- Built reusable frontend components for multiple platforms
- Mentored junior developers and enforced clean code practices
- Collaborated with stakeholders for UX and compliance requirements
- Improved system performance and code maintainability across projects
- Designed and maintained relational and non-relational database structures
- Integrated third-party services and APIs for business process automation
- Supported legacy systems while migrating features to modern frameworks and technologies
- Implemented authentication, authorization, and security best practices in applications
- Performed debugging, testing, and deployment for web applications
- Created dynamic dashboards and reporting tools for internal operations
- Participated in system architecture planning and technical decision-making

Education

Bachelor of Science in Information Technology
ACLC College | 2011 – 2017

Certifications

- Certified PHP with Laravel Framework – Ground Gurus
- Complete NodeJS Developer – Udemmy
- Mobile Application Development – Certificate of Completion
